

# SCALES OF ALL SORTS

## TWO - HANDED BELL SCALES

Bell Scales are named for their sound. They are a good way to begin scale work; two-handed scales can be done by the earliest beginners - child or adult.

Place both hands as indicated before you begin, after completely closing each hand, replace immediately so it is ready for the next round.

y

rh 1 2 3 4  
lh 4 1 2 3 4

q The Seahorse level is done by playing the scales one handed, crossing the thumb over, just before playing 4. When you can do each line with each hand, then put them together.

1 2 3 4 x1 2 3 4 1 2 3 4 x1 2 etc...

u Review the seahorse set, and now reverse your hands playing the top line with your lh and the bottom with the rh, as well as making your own variations.
